‘Evolution and Innovation’ drive Conference theme

HAPIA is pleased to confirm details for the **2014 National Workplace Health Conference** (formerly the AHPM Congress).

The conference will be staged at the Hilton Hotel in Sydney on Monday 24 and Tuesday 25 November.

The theme for this year’s industry conference is; ***‘EVOLUTION AND INNOVATION IN WORKPLACE HEALTH – accelerating organisation success and competitive advantage’***.

HAPIA will be hosting the conference this year – under its new brand name ‘Workplace Health Association Australia’ – with the support of AMMP event managers. A Conference Sub-committee, led by HAPIA Vice-President Leanne Scanes, will be coordinating an engaging new conference agenda under the ‘evolution & innovation’ theme.

“We are keen to press the ‘refresh button’ on this annual event and evolution and innovation will certainly be the underlying focus as we address declining health trends and move workplaces towards cultures of health and performance”, HAPA CEO Graham Fredericks emphasised.

A general information & save the date brochure, Call for Abstracts and Sponsor & Exhibitor Prospectus will be circulated by AMMP in August.
